Summary

A driven, hardworking individual studying to complete a Master of Engineering degree in Computer Science. I have experience in teaching assistance, managing a customer service team, working in software development teams and practical skills for renovation projects. Express a strong passion for my subject and received the Netcraft prize for top 5 third year MEng Computer Science students. Seeking to undertake a PhD to deepen my knowledge of my subject.

Achievements

- Netcraft prize for top 5 third year MEng Computer Science students - 2019/20
- Mentored the top second year Software Product Engineering project - 2019/20

Experience

09/2019 to Current

HPT Teaching Assistant
University of Bristol – Bristol, Somerset and Avon
Part-time teaching assistant for the following modules in Computer Science:
Second Year Module - Software Product Engineering (September 2019 - Present)

- Mentor two student development teams
- Offer advice and potential solutions towards issues that the team may face
- Organise biweekly meetings to monitor progress, team harmony and interaction with their client
- Ensure the team are following the correct development process: Test Driven Development, Continuous Integration, Issue Tracking, and other relevant processes

Third Year Module - Computer Graphics (October 2020 - Present)

- Assist students in weekly timetabled lab slots
- Guide students towards solutions on issues they are stuck on, while encouraging them to gain a better understanding of the concept/underlying maths so that they can translate it to code

07/2019 – 09/2020

Grounds Maintenance Operative
Leehurst Swan Independent Day School – Salisbury, Wiltshire
Part-time work which involved assisting with maintenance of the school grounds, this included tasks such as:

- Gardening
- Painting
- Plumbing
- Transportation of supplies, furniture and equipment
- Assisting the redevelopment of school changing rooms
- Maintaining schools sports facilities

05/2018 – 08/2018

Customer Service Supervisor
Co-op – Fordingbridge, Hampshire
Part-time assistant with the customer service team at the Co-op. This included:

- Authorising age restricted sales
- Handling coin exchange to restock cash register
- Counting the total float for the start/end of the shift
- Organising the on-floor team. This involved organising breaks and lunches to ensure that service to the customers was not disrupted

Education

2021 – Expected

Master of Engineering: Computer Science
University of Bristol – Bristol
Overall year grades:

- First Year (64%)
- Second Year (69%)
- Third Year (79%) - Top 5 CS/CS+Maths students
- Fourth Year (In Progress)

2017 – Completed **A-Levels**

The Burgate School and Sixth Form – Fordingbridge

AS Level:

- Computer Science - A
- Further Mathematics - A
- Mathematics - A
- Physics - A

A-Level:

- Extended Project Qualification - A
- Computer Science - A
- Further Mathematics - A
- Mathematics - A*

2015 - Completed **GCSEs**

The Burgate School and Sixth Form – Fordingbridge

- Additional Science - A*
- English Language - A*
- English Literature – A
- European/International Computer Driving Licence - Distinction*
- French – C
- Further Mathematics – A
- Geography – A
- History – A
- Mathematics – A
- Physical Education – A
- Science A: Single Award - A

Skills

- Teamwork
- Mentoring
- Programming (C, C++, C#, Python, Java, JavaScript)
- Problem solving
- Practical Skills
- Research

Projects

66-days

A habit-tracking and management app, developed in a team of 4, which allowed the user to set goals for positive habits they wished to achieve. This app was developed for a client who provided us with a list of requirements. They had also designed a "habit management course" and wanted the content to be delivered on a separate section of the app. They also required that the app native to both Android and iOS and supported features such as:

- Account creation and sign in
- Monitoring statistics and visualising habit progress on graphs for the user
- Support for the client to update the app content on a separate website
- Monitoring course engagement and habit tracking success on the client's website

VR Horror Experience

A VR horror game, developed in a team of 7, where the player had to navigate a desolate and decrepit hospital trying to survive from a monster which stalked them. Elected lead programmer of this project and was required to oversee and manage the code base. Features of the game included:

- An extensive, interactable items/triggerable events framework for the player to use
- Monster AI pathfinding
- Custom particle effects, textures and models designed by the development team

Hobbies and Interests

Sports:

- Football
- Rugby
- Hockey

Undertaking personal projects:

- Built own computer
- Programmed Chess Engine
- Programmed a Poker mini game
